

## MEDICAL EXPERT TRAINING "PERORAL ENDOSCOPIC MYOTOMY (POEM)" 13 OCTOBER 2018

KYIV, UKRAINE

## → INTRODUCTION

Peroral endoscopic myotomy (POEM) is the application of esophageal myotomy to the concept of natural orifice transluminal surgery (NOTES) by utilizing a submucosal tunneling method. Since the first case of POEM was performed for treating achalasia in Japan in 2008, this procedure is being more widely used by many skillful endoscopists all over the world. Currently, POEM is a spotlighted, emerging treatment option for achalasia, and the indications for POEM are expanding to include long-standing, sigmoid shaped esophagus in achalasia, even previously failed endoscopic treatment or surgical myotomy, and other spastic esophageal motility disorders. Accumulating data about POEM demonstrate excellent short-term outcomes with minimal risk of major adverse events, and some existing long-term data show the efficacy of POEM to be long lasting.

## → CONCEPT

This training is two-day hands-on training course.

Maximum number of participant is 15, workshop language will be English.

## → FACULTY

**Lee Swanström MD, FACS, FASGE, FRCS**

**The head the Division of GI and Minimally Invasive Surgery at the Oregon Clinic**

**Director of the Providence Health System's Complex GI and**

**Foregut Surgery Postgraduate Fellowship Program**

**Kiril Marakhovskiy PhD, M.D.**

**The head of the diagnostic department**

**Republican Scientific and Practical Center for Pediatric Surgery**

**Chief specialist in pediatric endoscopy of the Ministry of Health of the Republic of Belarus**

**Vladyslav Yakovenko PhD, MD**

**The head of the department of endoscopy and minimal invasive surgery. Medical center "Oberig" Universal hospital", Kyiv, Ukraine.**

**The senior researcher scientist in State Scientific Institution "Scientific-practical center of prophylactic and clinical medicine" of Administrative Department, Kyiv, Ukraine.**

**The associate professor in National Medical University named after O. Bogomolets**
