

**OLYMPUS**

**Workshop ESD&POEM**

**07–08 December 2018**

**EREVAN, ARMENIA**

## → INTRODUCTION

**Endoscopic Submucosal Dissection (ESD)** has shown over the last years its great potential to enable endoscopic en-block resection of early lesions in the GI tract and thus make the therapy potentially less invasive. Still, the technique is time consuming and requires a high level of skill in order to be safely performed.

This training course offers the opportunity to learn the ESD techniques from highly experienced trainers. The workshop will give a comprehensive overview on the indications and clinical data of ESD in Europe.

## → CONCEPT

The workshop is a two-day hands-on training course which will provide an in-depth understanding of ESD and POEM. Hands-on training will allow some of the basics of the technique, while live surgery will allow a better understanding of the set-up for these procedures.

Maximum number of participants is 10, workshop languages will be English.

## → FACULTY

**Yakovenko Vladyslav Olexandrovych, PhD, MD**

The head of the department of endoscopy and minimal invasive surgery. Medical center “Oberig” Universal hospital”, Kyiv, Ukraine.
